McSam | Portfolio

A passionate programmer that is willing to try out new stuff and go outside of comfort zone. Mainly worked with web application development, while also dabbling with mobile applications and some simple DevOps (CI/CD). I am capable of working with both back-end and front-end software development. Recently, I'm highly addicted to the React ecosystem and would like to pursue my career in this area.

WORKING EXPERIENCES

1. **Intern** @Finexus Eprotea Sdn. Bhd.
   3 Months
   - Internship
   - Create SQL Script
   - Software tester

2. **Full Stack Developer** @Newgate Software Sdn. Bhd.
